Project Scope

Ctrl Alt Elite - COMP30022 IT Project

Project Name	Elite Flex E-Portfolio		
Project Supervisor	Umair Mawani		
Document Version No.	v1.1	**Date**	24/08/2020
Team Members	● Aman Bhuyan ● Anjali Manoj Ahuja ● Chung Lin (Nicholas) Wong ● Jiseong (Daniel) Oh ● Josh Sanon		

Project Justification	The Elite Flex E-Portfolio system will be an online showcase of a client's work and experiences. The system can be as an online résumé by clients to then apply for jobs, boosting their profile strength.
Project Objective	To create a platform for clients to design, store, and display their online portfolios.
Project Deliverables	● Web application-based e-portfolio system. ● Personally customisable profile per client. ● Backend storage solution for media files, such as documents and images.
High Level Requirements	● Online deployment of the system. ● Storage capabilities for documents, pictures and other media. ● Admin privileges for users to customise their specific/allocated portfolios.
Exclusions (Out of Scope)	● New users are unable to upload their portfolios and content to the system. ● Social media aspect will not be implemented.
Assumptions	● Deployment platform (*Heroku*) will be stable throughout and will be available at initiation of the project. ● Data to be stored will be of reasonable size, in compliance with storage budget.
Constraints	● Limited budget. ● Self-learning aspect of the project will slow down the delivery schedule. ● Team members are final semester university students working on other subjects concurrently, which affects time dedicated to this project.
